

## Ethics and YOU!

Have you ever thought about the impact of your actions? As a mechanic, how important are the actions you take? If shortcuts save you time and your employer money, how is that a bad thing? What is ethics, and how does it apply to your chosen career field? Come join us and hear about the tremendous importance YOU play in the safety of the traveling public and how the decisions you make in the workplace can have lasting impacts on your customers. Learn how to resolve ethical conflicts at work and hear how others have done the same.
